# NO NEW JAIL BECAUSE

Black people make up 56% of SF's jail population, yet only account for 4% of the city's population. A new jail will only expand this racist system.

People with mental illness make up a large majority of the prisoners in sf jails. We should be investing in quality health services, not more cages.

84% of people in SF jails are pre-trial, which means they have not even been convicted of a crime and are in jail simply for not being able to afford bail. Simple bail reform will make a new jail completely unnecessary.
